

HOSTING
TAKING YOU FURTHER

HOSTING Cloud Desktop™

ANYPLACE. ANYTIME.

Imagine a world where employees could work on any device from anywhere. Where a lost laptop didn't bring a full-scale security meltdown. And where poor technology was no longer an excuse for poor productivity.

Imagine the world of **HOSTING Cloud Desktop™**.

HOSTING Cloud Desktop brings the power of cloud computing to the workplace by enabling employees to securely access their MS Windows environments and critical data from any device – anytime, anywhere – securely and efficiently, while dramatically reducing support costs.

Compliance & Security

Securing traditional desktops is nearly impossible – making it difficult, if not impossible, to meet strict compliance requirements. The 80+ control attributes offered by HOSTING Cloud Desktop enable you to keep data in our secure facilities and not on user devices. And our industry-leading security standards protect your consolidated desktop environments 24 x 7 x 365 in our SOC 2- and SOC 3-audited and PCI-certified data centers.

Capital Avoidance

We provide a lower cost desktop TCO that allows you to extend the life of assets or migrate to thin/zero clients. Better yet, let your employees bring their own device. The plug and play solution allows you to integrate with your existing infrastructure and vendors.

Key Benefits of HOSTING Cloud Desktop

- **Compliance Support:** Ability to certify exactly what information has come into (and out of) the PC environment
- **Increased Agility:** Ability to quickly update desktop images including operating systems and applications
- **Long-term Solution:** No need to refresh hardware every few years
- **Unmatched Scalability:** Ability to add or remove virtual desktops with the click of a mouse
- **No Hidden Fees:** Low monthly cost includes all of the servers, networking, patching, antivirus, and licensing (OS and office).

Bringing The Power Of Cloud Computing To The Desktop

ANY DEVICE

ANY LOCATION

IT Optimization

With full integration into your existing systems you can manage all of your users from a single pane of glass. Rapid provisioning allows your team to deliver consistent user applications to desktops in minutes. Free up time and resources to focus on your core business, not on desktop support.

Flexibility & Performance

Our solution allows your employees to work on any device from any location, including their personal PC's, iPads or even telephones – no VPN required! Your staff can even start a project on one device and finish it on another, meaning enhanced productivity and sharing capabilities for your team.

HOSTING Cloud Desktop Configurations

HOSTING offers flexible solutions to meet all user requirements:

	Prime User	Pro User	Power User	Power +
Virtual Processor (Cores)	1	2	4	4+
Memory (GB)	2	4	6	6+
Persistent Storage (GB)	Available	Available	Available	Available
User Type	Task	Administrative	Knowledge	Power

All Inclusive Service

Each HOSTING Cloud Desktop comes fully loaded with an operating system, patching, anti-malware and more. In addition, customers can add services a-la-carte to meet their unique workforce requirements.

Included Features	
Operating System Licensing	Secure (SSL) Access
Operating System Updates/Patches	Data Back/Protection
