CLOUD MIGRATION SERVICES
WITHOUT A STRATEGY, MOVING TO THE CLOUD IS A CHALLENGING ENDEAVOR

The next step after a Cloud environment has been designed and built is to move in. Migrating to a Cloud platform can be a risky and disruptive task without a strategy. Aggressive timelines, budget pressures, limited manpower, lack of expertise, impact to current systems, and limited project planning are common challenges during migration. With a custom-designed migration plan from HOSTING, you can get to the Cloud with confidence.

Our managed Cloud hosting solutions are production-ready with enterprise-class technologies, giving you access to virtually unlimited memory, processing, and storage resources. HOSTING facilitates your Cloud migration with an efficient process that limits risk to data and dramatically reduces impact on the production environment. Whether a plan includes migrating one host machine or multiple servers, we execute the move to our Cloud platforms quickly and securely.

Our team of professionals uses the experience from the migration of thousands of machines to ensure that systems remain online and data stays secure. And our fixed price makes it easy to budget. The process requires limited involvement from your internal IT team, allowing you to focus on other business priorities.

HOSTING'S COMPREHENSIVE PROFESSIONAL SERVICES PORTFOLIO

CLOUD ENABLEMENT

- Capacity Assessment
- Cloud Migration

DISASTER RECOVERY SERVICES

- Planning

OPTIMIZATION

- Data Assessment
- Database Assessment
- Security Assessment

OUR PROCESS

SYNCHRONIZE

Our process starts by synchronizing the source machine to the HOSTING target environment. During this process, the data is transmitted securely to HOSTING without any changes to the source environment. For additional peace of mind, rollback is available at any time.

MONITOR

Throughout the process, we attentively monitor the environment to ensure the migration stays within the specified parameters. This helps to minimize downtime and impact to the business-critical production environment.

TEST

Once the source environment is 100% synched to the HOSTING target environment, we provide full and dedicated access for final testing. Upon customer satisfaction with the migration, we coordinate a migration cutover schedule.

CUTOVER

Using automated scripts to eliminate human error, data is typically "live" in less than 60 minutes.

| SYNCHRONIZE | MONITOR | TEST | CUTOVER TO NEW CLOUD |

MOVE TO THE CLOUD WITH CONFIDENCE

REDUCE RISK

- Encrypted data transfer ensures data security
- Source environment synched with changes until final cutover
- Option to rollback at any time

LIMIT IMPACT

- Network throttle limits bandwidth used
- Redundancies minimize production impact

CONTAIN COSTS

- Fixed price for easy budgeting
- Limited internal impact
- Eliminates long-term maintenance and replacement costs

THE HOSTING DIFFERENCE

HOSTING is a leading provider of managed Cloud hosting and recovery services for mission-critical applications. With a unique lifecycle approach and the industry's best team, HOSTING helps organizations design, build, migrate, manage, and protect their Cloud-based environment.
