

HOSTING Unified Cloud Services for AWS™

You can outsource your infrastructure. Or you can solve your real IT headaches.

HOSTING leads the way in developing a complete unified cloud solution on the Amazon Web Services (AWS) Cloud Platform, setting the bar for performance, security and availability. While AWS has an extensive set of cloud tools, they fall short in providing essential security, compliance and support resources. HOSTING Unified Cloud Services for AWS bridges solution gaps by combining the flexibility and scalability of the AWS Cloud Platform with industry-leading managed services. The result is ONE Partner | ONE View – end-to-end support and visibility into the following:

- Health and wellness of applications
- Security and compliance postures
- Billing and spend management

AWS CLOUD PLATFORM EXPERTS

HOSTING AWS cloud experts seamlessly integrate cloud applications across the AWS platform, ensuring that AWS cloud infrastructure meets exact requirements. Organizations have the freedom to build, deploy and manage

applications in a compliant, secure and highly available environment – backed by the industry's most aggressive Service Level Agreements (SLAs).

UNIFIED MONITORING

HOSTING Unified Monitoring for AWS provides system-wide visibility into resource utilization, application performance and operational health. Organizations can track their entire environment in real-time across multiple data centers and cloud providers.

- Collection and analysis of more than 330 AWS metrics – 66% more than AWS CloudWatch
- Insights to thousands of metrics for Linux, Windows, SQL Server and other common web applications.
- End-to-end visibility on the health and availability of the AWS infrastructure, applications, OS, storage, and all other dependent technologies
- Automatic dependency mapping for the entire infrastructure
- Built-in, optimized automatic alerts and dashboards

CLOUD SECURITY

HOSTING Unified Cloud Services offers unmatched availability, recovery and security; ensuring applications remain available and in compliance with industry regulations such as HIPAA, PCI, SOX. Organizations can send and store metrics that are critical their application's operational performance and compliance status to help track trends and proactively address any issues.

- Intrusion detection
- Log monitoring
- Malware protection
- Web application firewall
- Integrity monitoring
- Vulnerability scanning

COMPLIANCE MONITORING

HOSTING Compliance Services empower organizations to proactively manage their compliance-related activities on an ongoing basis. Organizations can manage their compliance activities on their own through the HOSTING Compliance Dashboard, or take advantage of HOSTING Managed Compliance Services.

- **HOSTING Compliance Dashboard**

The HOSTING Compliance Dashboard enables organizations to compile an “electronic book of evidence” that details their IT infrastructure as well as relevant logging and tracking activities.

- **HOSTING Managed Compliance Services**

HOSTING Managed Compliance Services provides all the capabilities of the HOSTING Compliance Dashboard. It also includes the services of an IT Risk and Compliance Analyst to advise on solution design and documentation; change and issue management, and technology integration.

PROACTIVE COST MONITORING

HOSTING helps simplify financial planning with straightforward quarterly billing, enabling organizations to view spending trends, analyze costs and adjust resource investments.

CLIENT-DRIVEN, ALWAYS-ON SUPPORT FROM AWS EXPERTS

HOSTING clients can access live 24 x 7 x 365 support from seasoned Tier 2 or Tier 3 support specialists who resolve issues around the clock – regardless of time zone. They can also log into a robust set of monitoring and management tools via the HOSTING Customer Portal™.

Why invest in expensive architecture alone that leaves you scrambling to fill solution gaps? HOSTING cloud experts can build and manage a unified cloud solution that meets your exact requirements. So you can focus on your business, instead of your infrastructure.

ABOUT HOSTING

HOSTING delivers secure, compliant, highly available cloud solutions that empower companies to increase their revenues, reduce their expenses and manage their risk. Headquartered in Denver, Colorado, HOSTING owns and operates six geographically-dispersed data centers under an ITIL-based control environment validated for compliance against HIPAA, PCI DSS and SOC (formerly SAS 70) frameworks. Its superior infrastructure, expert cloud architects and industry-leading customer satisfaction scores have been consistently recognized by Gartner in the Managed Hosting Magic Quadrant.
