HOSTING UNIFIED CLOUD SERVICES FOR AZURE™

Microsoft Azure offers a powerful infrastructure and extensive set of tools for developing customized environments. However Microsoft doesn't manage, monitor or secure cloud environments on Azure. As a result, customers still must invest in additional services to ensure their environments are secure, compliant and highly available.

If outsourcing your infrastructure to Azure requires you to invest in additional security, service and support, are you getting what you really need?

YOU CAN OUTSOURCE YOUR INFRASTRUCTURE. OR YOU CAN SOLVE YOUR REAL IT CHALLENGES WITH HOSTING UNIFIED CLOUD SERVICES FOR MICROSOFT AZURE™

"The HOSTING offering of both public and private compliant cloud solutions built on the Microsoft Cloud Platform bring a unique offering to the market."

- Aziz Benmalek, Vice President, Worldwide Hosting and Cloud Services – Microsoft

HOSTING was the first U.S. partner to collaborate with Microsoft to develop a unified cloud on the Microsoft Cloud platform, combining robust tools with forward-thinking managed services. The HOSTING Unified Cloud Services for Azure™ offers:

- Freedom to create applications using the latest cloud innovation tools
- Highest levels of performance, security and compliance
- ONE Partner | ONE View™ – a single view into the health and wellbeing of applications

MICROSOFT CLOUD PLATFORM EXPERTS

HOSTING Microsoft Cloud Platform experts craft a true unified cloud solution that encompasses the critical aspects of a comprehensive managed cloud solution including:

Azure migration success planning: HOSTING managed cloud offerings support the Microsoft Cloud Platform, including Azure public and private clouds built on Windows Server 2012 R2 with Hyper-V, System Center 2012 R2 and Windows Azure Pack. Our cloud migration experts implement a secure, proprietary process that guarantees a successful Azure cloud migration every time.

Cloud lifecycle management: HOSTING cloud solution experts architect, deploy and provide ongoing management for organizations' solutions. While Azure services typically only address its own tools and infrastructure, HOSTING manages an organization's entire application stack. Through future-focused planning, HOSTING cloud architects ensure that each customer's unique cloud environment meets their evolving business requirements.

Cloud security and compliance expertise: Availability, recovery and security services including malware protection, managed patching and file integrity monitoring are integrated into the Microsoft Cloud environment, so that applications remain available and in compliance with industry regulations.

Client-driven, always-on support: HOSTING customers have access to immediate, round-the-clock assistance from seasoned Tier 2 or Tier 3 support specialists via phone, email and chat. They can also leverage intuitive, easy-to-use monitoring and management tools via the HOSTING Customer Portal. HOSTING Unified Cloud solutions are also backed by complete, customer-friendly SLAs.

Cost analysis and spend monitoring: HOSTING Unified Cloud experts provide insight into Azure cloud costs and highlight areas for potential savings. They help simplify financial planning and eliminate billing surprises.

"There are efforts from the likes of HOSTING to provide a single compliance and security layer across an entire infrastructure services portfolio . . . HOSTING has moved to support multiple massive-scale clouds and others are not far behind."

- Structure Research

ABOUT HOSTING

HOSTING delivers secure, compliant, highly available cloud solutions that empower companies to increase their revenues, reduce their expenses and manage their risk. Headquartered in Denver, Colorado, HOSTING owns and operates six geographically-dispersed data centers under an ITIL-based control environment validated for compliance against HIPAA, PCI DSS and SOC frameworks. Its superior infrastructure, expert cloud architects and industry-leading customer satisfaction scores have been consistently recognized by Gartner in the Cloud-enabled Managed Hosting Magic Quadrant.
